WORKS TO START ON THE EYRE STREET STORMWATER PUMP STATION

Construction on the Eyre Street Stormwater Pump Station project is to be undertaken by BMD Constructions with the mobilisation of the site facilities occurring on Monday 29 April 2019. Traffic control requirements will be put in place which will limit access in the vicinity of and through Eyre Street between Tasman Terrace and Liverpool Street. As the project progresses, traffic restrictions will be progressively changing to suit the work phases of the project.

Throughout the life of the project there will be multiple varying traffic arrangements which will include:

- Closure of Eyre Street between Liverpool Street and Washington Street
- Partial closure of Eyre Street between Washington Street and Tasman Terrace
- Occupation of the existing car park on Tasman Terrace (" Whirley's Carpark ")
- Temporary closures of both Washington Street and Tasman Terrace (with suitable detours in place) for services to cross both roads
- Temporary staged works across Liverpool Street, maintaining through traffic at all times
- Temporary occupation of the lawn area at the corner of Tasman Terrace and Eyre Street

Council and BMD Construction will advise of further details and durations of the closures via:

- Electronic Variable Message Signage Boards warning of upcoming closures
- Suitable traffic control and signage; and
- Letter box drops.

The pump station scope of the works involves the installation of steel sheet piles to be driven into the ground within Eyre Street. The sheet pile installation is set to commence on the 19 May 2019 and will take approximately two weeks to complete, with the overall project scheduled to be completed by the end of the year.

Mayor Brad Flaherty, said "While the works will be quite disruptive with various traffic controls in place and will be noisy during the sheet piling activity, these works are necessary to improve the management of stormwater in and around the Eyre Street and Liverpool Street area."

Council and BMD Construction look forward to delivering another much needed asset for the community and as such value the community's understanding and support throughout the construction period.
